

Colette Ntsila

Motivated Computer Science student specializing in Java and web development, seeking a Software Development internship to apply academic knowledge, build real-world experience, and contribute to impactful projects.

EXPERIENCE

- Completed multiple software development projects as part of coursework.
- Provided tutoring and mentoring to fellow students, assisting with programming concepts and problem-solving.

EDUCATION

Bushbuckridge Secondary School, Mpumalanga — Bachelor - Degree

Jan 2023 - Nov 2023.

**Tshwane University Of Technology, Mpumalanga— Dip
(Computer Science)**

Feb 2024 - June 2027

I'll be completing my course in the first semester of 2026, Then i'll graduate in 2027.

PROJECTS

Municipal Complaint Reporting System (Team Project)

Developed an innovative smart municipality reporting platform designed to improve communication between citizens, municipal workers, councillors, and administrators.

Key Features:

- Complaint reporting and tracking
- Admin dashboard for escalation and management
- Councillor dashboard for assigned cases
- Role-based authentication and access control
- Real-time complaint workflow handling

Technologies Used:

React, JavaScript, Supabase, HTML, CSS

Database & Architecture:

Implemented Supabase cloud database technology to enable global access and real-time synchronization across multiple devices and users.

Impact:

Presented as one of the standout innovation projects showcased on campus during 2026 because of its originality and real-world social impact.

Portfolio:

Car Wash Queue Management System (Team Project)

Developed a modern queue management system for a newly established car wash business associated with DOT, the Toyota Hilux 4x4 influencer brand.

Key Features:

- Vehicle queue tracking
- Customer workflow management
- Queue monitoring dashboard
- Service process optimization

Technologies Used:

React, Spring Boot, Java, HTML, CSS
Backend & Database: Used Spring Boot to simplify backend configuration, API integration, and automatic database connectivity through auto-configuration features.

Impact:

Designed to improve operational efficiency and customer experience within a growing business environment.

Haircut Booking Web Application

Built a responsive web application that allows users to schedule haircut appointments and manage bookings online using modern frontend development technologies.

Task Manager App

- Developed using Java to manage and prioritize academic tasks, improving productivity and time management

Creche App

- Built an application for registering and managing children's information at a creche.
- Implemented data storage using text files to simulate basic database functionality.

Encryption Message App

- Created an application that encrypts messages stored in text files.
- Ensured messages are converted into unreadable formats for privacy and security.

Portfolio website

- Designed and developed a personal portfolio website to showcase skills, projects, interests. Highlighted both academic experience and personal development as a software developer.

SKILLS

Technical Skills

- JAVA
- HTML, CSS, JavaScript
- SQL
- Kotlin
- Java is my greatest strength
- React

Professional Skills

- Quick learner
- Teamwork & Communication
- Problem-Solver
- Mentoring or helping others
- Great listener
- Willingness to take initiative

AWARDS

Top 3 in Java Programming

I have been announced to be one of the top students in the programming language specifically JAVA.

Top learner in Mpumalanga

For this one they took us to SAICA Camp to help with Matric due to our potential

LANGUAGES

English, Zulu , Swati, Xhosa, Sepedi, Sesotho and Sepulana
